CONTAINMENT****TUNNELS****BASEMENTS****Project:** City Road Basin, London Borough of Islington**Client:** Charter Construction**Images:****Project Description:**

Regeneration of the land and waterways around City Road Basin Islington follows decades of industrial decline. A master plan was implemented which creates a high density, mixed-tenure residential development that opens the basin up to public use with parks, walkways and a range of lively commercial and community uses. The placement of two towers provides the strongest possible change of identity for the basin area and a metaphorical gateway to one of Islington's largest but previously undiscovered amenities.

A requirement for a for a long lasting 100% effective waterproofing system was essential. As a result Pitchmastic PmB were chosen as the preferred sub contractor applying over 4000m² structural waterproofing to podium areas, planters and basement structures.
