CAR PARKS

Project : Hillsborough Car Park Refurbishment
Location: Sheffield, United Kingdom
Client: Cooperative Insurance Society Limited

Image:

Description:

This busy local shopping centre car park was in urgent need of repair but had to be kept operational throughout the refurbishment.

Pitchmastic was chosen to install the seamless PmB waterproofing membrane to this elevated car park to eliminate the risk of leakage and disruption to the shops below. The client elected to cover the works areas with tenting to avoid delays caused by inclement weather conditions.

The car park was to be surfaced using HRA and therefore Pitchmastic proposed the use of its aggregated resin based tackcoat layer. This aggregated key provided an enhanced mechanical bond between the PmB membrane and surfacing material. To complete the structural waterproofing package, Pitchmastic applied a UV protection coating to up stands to maintain the aesthetic appearance of the surface and BP2 integral movement joints were installed in the deck to provide a homogeneous seal.
