**Project :** Hurlfield Service Reservoir

**Location:** Sheffield, United Kingdom

**Client:** Yorkshire Water Services Ltd

**Supervising Officer:** Babtie Group Ltd

**Main Contractor:** Henry Boot Construction (UK) Ltd

**Images:**

**Description:**

PmB was selected as the waterproofing membrane for the roof areas of the two tanks and valve house on this new 2.7 TCM capacity service reservoir.

The system was chosen because it could provide a seamless and impermeable barrier against the ingress of rainwater and other potential contaminants into the potable water tanks.

The membrane has the inbuilt properties of high flexibility, excellent bond values to most substrates, rapid installation and curing periods ensuring timely completion of projects.

These properties, together with the assurance of BS6920 Water Bylaws Scheme approval, gave the client the confidence to approve the system for this critical location. The membrane was rapidly installed and completed to the full satisfaction of both the main contractor and client.
