**Project :** New Equine Pool  
**Location:** Newmarket, United Kingdom  
**Main Contractor:** French Kier Anglia  
**Client:** Godophin Management Company

**Image:**

**Description:**

PmB was specified for the waterproof lining on this new equine pool at Stanley House Stables in Newmarket following its successful use on two similar structures in the UAE.

The system was installed to the internal faces of the pool to prevent water leakage and to protect the structure from corrosion.

In view of the need for impact resistance inflicted by the horses whilst entering and swimming within the pool, the membrane was applied at varying thicknesses of up to 8mm in places.

Once completed the PmB system was subject to quality testing, including adhesion and a full electronic survey to ensure integrity throughout the installation.

The application was completed ahead of programme and to the satisfaction of all concerned.
